Undergraduate Mems and Microfluidics Graduation Project With Excellent Grade at ZC:UST under supervision of Dr. Noha Gaber

Design of novel electrostatically powered peristaltic micropump with a single chamber and NED cantilever structure. A thorough fabrication recipe was developed. NED cantilever structure provided a permanent solution for pull-in effect in electrostatic based systems. Wide range of applications as it can be used in precise drug delivery/dosing systems, developing cooling systems for electronic systems, such as System-on-a-Chip and embedded systems, as well as Lab-on-a-Chip and testing kits. ITAC-CFP - ITIDA Funding.
